Ministry of Innovative Development of the Republic of Uzbekistan

Ministry of Agriculture of the Republic of Uzbekistan

Tashkent State University of Economics

Leibniz Institute of Agricultural Development in Transition Economies

International Food Policy Research Institute

Tashkent State Agrarian University

Samarkand branch of Tashkent State University of Economics

University 3.0 International Educational and Scientific Innovative Research Center

The Purpose of the Conference

The five Central Asian countries have considerable differences and complementarities in the availability of productive land, energy and water resources, and the resulting agricultural production portfolios. These country differences and complementarities can form the basis for cooperation in policies, regulation, trade, and regional infrastructure development. Coordination of food, trade and infrastructure policies, harmonized innovation and science policies, and coherence in institutional arrangements will be vital for fostering sustainable regional development.

The three-day conference aims to serve as a platform for scholars, scientists, representatives from policy and business communities, and civil society to discuss options and alternatives for promotion of food security and nutrition, sustainable agricultural development, and regional cooperation in Central Asia. Contributions from multi-country, single country and comparative studies from economics, sociology, and political science perspectives as well as practitioners are invited to the conference.

Conference thematic blocks

Food security amid COVID-19 pandemic

Creating an environment to enable the development of competitive agribusiness and food value chains

Public policies and support of agri-food sector

Opportunities and challenges for education and research in agri-food sector

Digital technologies and sustainable, inclusive agri-food sector
